Examples of accounting principles. There are some of the main accounting principles and guidelines, listed under US GAAP: Conservatism principle - In situations where there are two acceptable solutions for reporting an item, the accountant should 'play it safe' by choose the less favourable outcome. This concept allows accountants to anticipate future losses, rather than future gains.

In the United States, auditing standards require the auditor to state whether the financial reports are presented in accordance with generally accepted accounting principles (GAAP). Many other countries have adopted the standards supported by the International Accounting Standards Board (IASB) in London.
