Adaptive Engineering Group, LLC (AEG) was founded under the principle that no two projects are the same. Each and every project is unique and clients have differing needs and desires. Because of this, engineers and planners must be willing to adapt their solutions, designs, and plans to be tailored to each individual situation.

Adaptive Hydraulics (AdH) numerical code is a modular, parallel, adaptive finite-element model for one-, two- and three-dimensional (2D, and 3D) flow and transport. AdH simulates groundwater flow, internal flow and open channel flow. AdH was developed in the Engineer Research and Development Center's Coastal and Hydraulics Laboratory. AdH is ...
