I defend the claim that there is a necessary connection between law and ethics. I do so by analogy with other social rule-based systems, such as capitalism. Most social rule-based systems are (in part) conceptually understood by the collective overall content of their rules. If legal systems, which are also social rule-based systems, are best understood in the same way, then the collective overall content of legal systems' rules tells us how to understand the concept of law. One possibility for the collective overall content of legal systems' rules is ethical content. If so, then there is a necessary connection between law and ethics.

The exiled Russian sociologist and legal scholar Nicholas S. Timasheff's place in the forefront of the sociology of law was established with the publication, in 1939, of An Introduction to the Sociology of Law. His magnum opus articulates a systematic legal sociology. The book's title is misleading, giving the false impression that the volume is merely a textbook intended for classroom use. It is much more than this. An Introduction to the Sociology of Law is a sophisticated treatise that explains, precisely and methodically, the law as a social force. It makes two fundamental points: law can, indeed must, be studied by sociology, and law is a combination of socio-ethical and imperative coordination of human behavior.
