Archaeologists have always insisted that ancient lenses never existed. Robert Temple's detective work began when he discovered an artefact in the British Museum, believed to be plain rock crystal. He discovered it had been ground to form a lens and proved the true age of optical surveying techniques.

House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

In *Grocery*, bestselling author Michael Ruhlman offers incisive commentary on America's relationship with its food and investigates the overlooked source of so much of it—the grocery store. In a culture obsessed with food—how it looks, what it tastes like, where it comes from, what is good for us—there are often more questions than answers. Ruhlman proposes that the best practices for consuming wisely could be hiding in plain sight—in the aisles of your local supermarket. Using the human story of the family-run Midwestern chain Heinen's as an anchor to this journalistic narrative, he dives into the mysterious world of supermarkets and the ways in which we produce, consume, and distribute food. *Grocery* examines how rapidly supermarkets—and our food and culture—have changed since the days of your friendly neighborhood grocer. But rather than waxing nostalgic for the age of mom-and-pop shops, Ruhlman seeks to understand how our food needs have shifted since the mid-twentieth century, and how these needs mirror our cultural ones. A mix of reportage and rant, personal history and social commentary, *Grocery* is a landmark book from one of our most insightful food writers.
