velocity, acceleration and pressure.

Longitudinal Waves Gizmo : ExploreLearning
Sound waves are examples of longitudinal waves, or waves in which particles move back and forth in the same direction as the wave. You can use the Longitudinal Waves Gizmo TM to explore the behavior of sound waves. In the Gizmo, an air-filled tube contains 24 evenly-spaced, airtight dividers. To begin, select the Pulsed waves setting and the Open tube . Set the Strength to 1.00. Deselect the ...

Student Exploration Longitudinal Waves Gizmo Answer Key

The amplitude of a longitudinal wave is equal to the distance a point on the wave is displaced from its resting position. Turn off the lights. Click Play, and then click Pause. Use the horizontal ruler to measure the width of the green trace.

Student Exploration: Waves (ANSWER KEY)

Explanation: A sound wave is an example of a longitudinal wave, in which the particle movement is in the same direction as the wave. As a sound source vibrates forward, the molecules next to the source are pushed together, forming a compression. As
