This timely volume examines the potential of integrated care in providing effective, accessible behavioral healthcare for Latino clients. The integrated care model is discussed in practical terms, with guidelines for the addressing the needs of Latinos in a coordinated, patient-focused setting. Specific points of attention include common behavioral and medical/mental health conditions (e.g., depression, chronic pain, tobacco use), special considerations in working with Puerto Rican and Cuban clients, and recommendations for working with children. These important issues are considered against the backdrop of opportunities and challenges inherent in integrated care and its implementation, in addition to the relevance of evidence-based interventions for this large and diverse population. Among the topics covered: Latino trends and health policy: from walking on eggshells to commitment Integrated health care for Latino immigrants and refugees: what do they need? Using a translator in integrated care settings Enhancing and improving treatment engagement with Hispanic patients Integrated depression care among Latinos Chronic disease management and integrated care among Hispanic populations Health psychologists, social workers, family physicians, and clinical psychologists will find Enhancing Behavioral Health in Latino Populations an important resource for their professional development, as well as part of the ongoing movement toward reduced disparities and

Public Gardens and Livable Cities changes the paradigm for how we conceive of the role of urban public gardens. Donald A. Rakow, Meghan Z. Gough, and Sharon A. Lee advocate for public gardens as community outreach agents that can, and should, partner with local organizations to support positive local agendas. Safe neighborhoods, quality science education, access to fresh and healthy foods, substantial training opportunities, and environmental health are the key initiative areas the authors explore as they highlight model successes and instructive failures that can guide future practices. Public Gardens and Livable Cities uses a prescriptive approach to synthesize a range of public, private, and nonprofit initiatives from municipalities throughout the country. In doing so, the authors examine the initiatives from a practical perspective to identify how they were implemented, their sustainability, the obstacles they encountered, the impact of the initiatives on their populations, and how they dealt with the communities' underlying social problems. By emphasizing the knowledge and skills that public gardens can bring to partnerships seeking to improve the quality of life in cities, this book offers a deeper understanding of the urban public garden as a key resource for sustainable community development.

National efforts have been made to encourage technology integration in teacher preparation with expectations for frequent and successful applications with K-12 learners. While online learning has become pervasive in many fields in education, it has been somewhat slow to catch on in K-12 settings. The Handbook of Research on Emerging Practices and Methods for K-12 Online and Blended Learning is a collection of innovative research on the applications of technology in online and blended learning environments in order to develop quality courses, explore how content is delivered across disciplines and settings, and support the formation of relationships and enrichment opportunities. While highlighting topics including learning initiatives, institutional policies, and program structures, this book is ideally designed for teachers, principals, early childhood development centers, university faculty, administrators, policymakers, researchers, and practitioners.

E-Marketing is the most comprehensive book on digital marketing, covering all the topics students need to understand to "think like a marketer". The book connects digital marketing topics to the traditional marketing framework, making it easier for students to grasp the concepts and strategies involved in developing a digital

marketing plan. With a strategic approach that focuses on performance metrics and monitoring, it is a highly practical book. The authors recognize that the digital landscape is constantly and rapidly changing, and the book is structured to encourage students to explore the digital space, and to think critically about their own online behavior. "Success stories," "trend impact," and "let's get technical" boxes, as well as online activities at the end of each chapter provide undergraduate students with everything they need to be successful in creating and executing a winning digital marketing strategy.

Nearly two-thirds of students require some form of remediation before taking college-level classes, and community colleges have become increasingly important in providing this education. Unfortunately, relatively few students complete the developmental courses required to make a transition to college-level work. Based on a three-year study of over twenty community colleges, *Basic Skills Education in Community Colleges* analyzes developmental education practices, exploring what goes wrong and what goes right, and provides a series of recommendations for improved practice. Including both classroom observations and interviews with administrators, faculty, and students, this valuable book balances critique with examples of innovation. Part One explores the instructional settings of basic

skills—the use of drill and practice and remedial pedagogy in math, reading, writing, and ESL, as well as innovations in colleges that show developmental education need not follow remedial pedagogy. Part Two examines institutional factors shaping basic skills and provides recommendations for improving the quality of basic skills instruction. The research-grounded observations and recommendations in *Basic Skills Education in Community Colleges* make this an invaluable resource for scholars, administrators, and faculty aiming to help students progress through developmental education to college-level work and beyond.

This volume examines contemporary political relations between Turkey and the Middle East. In the light of the Arab Uprisings of 2011, the Syria Crisis, the escalation of regional terrorism and the military coup attempt in Turkey, it illustrates the dramatic fluctuations in Turkish foreign policy towards key Middle Eastern countries, such as Iran, Saudi Arabia, Egypt, Syria and Iraq. The contributors analyze Turkey's deepening involvement in Middle Eastern regional affairs, also addressing issues such as terrorism, social and political movements and minority rights struggles. While these problems have traditionally been regarded as domestic matters, this book highlights their increasingly regional dimension and the implications for the foreign affairs of Turkey and countries in the Middle East.
