Based on: Reader's choice / Sandra Silberstein. 5th ed., c2008.

The two volumes of Reader's Choice 4, Split Editions, contain all the high-quality reading skills and strategies in the fourth edition of Reader's Choice. Reader's Choice is based on the theory that proficient reading requires the coordination of a number of skills, but most important, the reader's ability to select the proper skills or strategies to solve each reading problem. The exercises and readings in the new split editions of Reader's Choice will help students become independent, efficient readers. Each carefully selected reading is accompanied by a wide variety of exercises, including a composition focus to facilitate use of the text in integrated reading-writing programs. Skills-focused units alternate with units centering on full reading passages. New in the split editions: " Visual literacy. Today's students are confronted with a dizzying array and combination of print and graphics. These editions feature activities that develop strategies for gleaning information from combinations of text and graphics. " Web work. The ability of today's students to evaluate information sources is nowhere more crucial than on the Internet. Web work appears in two skills units in book 1, and other activities accompany several reading selections. " New readings. The changing world around us has led to the addition of readings on topics such as genetic engineering, the globalization of tourism, and the cross-generational workplace. " Additional vocabulary. New readings bring additional vocabulary. New lexical items are topically related across a series of linked readings. Items are introduced and practiced in a variety of formats, reinforcing both the given item and more general literacy and acquisitions skills. Book 1 includes units 1-6 and unit 13 from the single volume of the fourth edition. Book 2 includes units 7-12 and unit 14 from the single volume of the fourth edition. Both volumes include an extensive lesson plan and guide for teachers and an answer key. The split editions of Reader's Choice 4 are supported by an accompanying website.

Describes the philosophy of the Daily 5 teaching structure and includes a collection of literacy tasks for students to complete daily.

Is Nick Allen a troublemaker? He really just likes to liven things up at school -- and he's always had plenty of great ideas. When Nick learns some interesting information about how words are created, suddenly he's got the inspiration for his best plan ever...the frindle. Who says a pen has to be called a pen? Why not call it a frindle? Things begin innocently enough as Nick gets his friends to use the new word. Then other people in town start saying frindle. Soon the school is in an uproar, and Nick has become a local hero. His teacher wants Nick to put an end to all this nonsense, but the funny thing is frindle doesn't belong to Nick anymore. The new word is spreading across the country, and there's nothing Nick can do to stop it.

Eleven-year-old Isabella ' s blended family is more divided than ever in this " timely but genuine " (Publishers Weekly) story about divorce and racial identity from the award-winning and New York Times bestselling author of Out of My Mind, Sharon M. Draper. Eleven-year-old Isabella ' s parents are divorced, so she has to switch lives every week: One week she ' s Isabella with her dad, his girlfriend Anastasia, and her son Darren living in a fancy house where they are one of the only black families in the neighborhood. The next week she ' s Izzy with her mom and her boyfriend John-Mark in a small, not-so-fancy house that she loves. Because of this, Isabella has always felt pulled between two worlds. And now that her parents are divorced, it seems their fights are even worse, and they ' re always about HER. Isabella feels completely stuck in the middle, split and divided between them more than ever. And she is beginning to realize that being split between Mom and Dad involves more than switching houses, switching nicknames, switching backpacks: it ' s also about switching identities. Her dad is black, her mom is white, and strangers are always commenting: " You ' re so exotic! " " You look so unusual. " " But what are you really? " She knows what they ' re really saying: " You don ' t look like your parents. " " You ' re different. " " What race are you really? " And when her parents, who both get engaged at the same time, get in their biggest fight ever, Isabella doesn ' t just feel divided, she feels ripped in two. What does it mean to be half white or half black? To belong to half mom and half dad? And if you ' re only seen as half of this and half of that, how can you ever feel whole? It seems like nothing can bring Isabella ' s family together again—until the worst thing happens. Isabella and Darren are stopped by the police. A cell phone is mistaken for a gun. And shots are fired.

In No Talking, Andrew Clements portrays a battle of wills between some spunky kids and a creative teacher with the perfect pitch for elementary school life that made Frindle an instant classic. It ' s boys vs. girls when the noisiest, most talkative, and most competitive fifth graders in history challenge one another to see who can go longer without talking. Teachers and school administrators are in an uproar, until an innovative teacher sees how the kids ' experiment can provide a terrific and unique lesson in communication.

" An extraordinary delight for a reader of any age. " —The New York Times Book Review Brian Floca explores Apollo 11 ' s famed moon landing with this newly expanded edition of Moonshot! Simply told, grandly shown, and now with eight additional pages of brand-new art and more in-depth information about the historic moon landing, here is the flight of Apollo 11. Here for a new generation of readers and explorers are the steady astronauts clicking themselves into gloves and helmets, strapping themselves into sideways seats. Here are their great machines in all their detail and monumentality, the ROAR of rockets, and the silence of the Moon. Here is a story of adventure and discovery—a story of leaving and returning during the summer of 1969, and a story of home, seen whole, from far away.

Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional

Reading Explorer, a six-level reading series, prepares learners for academic success with highly visual, motivating National Geographic content that features real people, places, and stories.
