For courses in algebra-based introductory physics. Make physics relevant for today's mixed-majors students College Physics: A Strategic Approach, Volume 2 (Chs 17-30), 4th Edition expands its focus from how mixed majors students learn physics to focusing on why these students learn physics. The authors apply the best results from educational research and Mastering(tm) Physics metadata to present basic physics in real world examples that engage students and connect physics with other fields, including biological sciences, architecture, and natural resources. From these connections, students not only to learn in research-driven ways but also understand why they are taking the course and how it applies to other areas. Extensive new media and an interactive Pearson eText pique student interest while challenging misconceptions and fostering critical thinking. New examples, explanations, and problems use real data from research to show physics at work in relatable situations, and help students see that physics is the science underlying everything around them. A Strategic Approach, Volume 2 (Chs 17-30), 4th Edition, encourages today's students to understand the big picture, gain crucial problem-solving skills and come to class both prepared and confident. Also available with Mastering Physics Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student.
