Teaching and Learning in the Pandemic - Education Week

Teaching and learning are vital processes in survival as they comprise the very foundations of growth. Both of these methods are necessary in achieving development by seeking to actualize significant changes in behaviors. Equally, they have various styles and theories that guide the education system. They are also essentially interconnected in a way that you have to learn something before you can actually teach it and that the act of teaching can make you learn something.

Differentiating learning and teaching is very easy. In direct definition, teaching is giving lessons about a particular subject to a group of learners. While learning is gaining knowledge by studying, being taught and experiencing. Many will assume that teaching is more important than learning, the truth is, learning is more important because it's the end goal of teaching.

Reality pedagogues/teachers believe that, for teaching and learning to happen, there has to be an exchange of expertise between students and teacher. For this exchange to happen, teachers need a set of tools called the "5 C's" to gain insight into student realities, and allow students to express their true selves in the classroom.
