Two-Stroke Engines Servicing & Repairs | St Neots Motorcycles

Most 2-stroke engines require that you mix the fuel with a special oil. In most small 2-stroke engines (like those for string-trimmers and chainsaws) the oil is mixed with the gasoline. In larger engines, the fuel is injected into the engine. This oil is required to lubricate the engine. In 4-stroke engines, the lubricating oil is in the crankcase.

Basic Small Engine Repair - Introduction to 2-Cycle Engine ...

At Performance Fabrications we offer specialist and dedicated 2-stroke servicing and parts, we recommend this as 2-strokes can be more unreliable than 4-strokes if not properly maintained, with the majority of 2-stroke motorcycles now aging it can be important to keep the entire motorcycle fresh to avoid any damage to the engine or other components.

2 Stroke Servicing - Performance Fabrications

Lubrication service procedures include mixing oil with fuel in two-stroke engines, and lubricating other moving parts.A tune-up consists of the adjustment and/or replacement of parts critical to smooth and efficient engine operation.

A two-stroke (or two-cycle) engine is a type of internal combustion engine that completes a power cycle with two strokes (up and down movements) of the piston during only one crankshaft revolution. This is in contrast to a "four-stroke engine", which requires four strokes of the piston to complete a power cycle during two crankshaft revolutions.In a two-stroke engine, the end of the combustion ...
