What is the business model for low-cost airlines? What can a SWOT analysis teach us about the beer war in South Africa? How does changing labour legislation affect staffing decisions. Business cases 2e is a case study book which is complementary to the Introduction to Business Management product suite (including Multiple Choice Questions for Introduction to Business Management). The cases illustrate how business management theory is applied to local organisations. This holistic approach exposes students to the important aspects of owning and managing a business, especially in the South African context. Business cases 2e is written for first-year Business Management students who are studying towards a degree or diploma. It may be used to accompany any introductory business management textbook.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing

and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and

grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Organized topically rather than historically, this book provides an excellent introduction to the subject of African Philosophy. Samuel Oluoch Imbo synthesizes the ideas of key African philosophers into an accessible narrative. The author focuses on five central questions: What are the definitions of African philosophy? Is ethno-philosophy really philosophy? What are the dangers of an African philosophy that claims to be 'unique'? Can African philosophy be done in foreign languages such as English and French? Are there useful ways to make connections between African philosophy, African American philosophy, and women's studies? By making cross-disciplinary and transnational connections, Imbo stakes out an important place for African philosophy. Imbo's book is an invaluable introduction to this dynamic and

growing area of study.

A best-seller completely revised and rewritten to conform to today's C++ usage.

Most students, regardless of their major, need to understand information systems and technologies and their importance to the success of business organizations. While many of today's students have lived with technology their whole lives, they do not see the connection between what they use every day and what they need to understand to be successful in the business world. Introduction to Business Information Systems, Third Canadian Edition by James Norrie, Michelle Nanjad and Mark Huber focuses on IT as a source of

business value and outlines the innovative technologies, as well as the innovative ways to use technology, that help businesses excel. The goal of this book is to teach students that the effective integration of IS with knowledge can drive the creation of significant business value. Introduction to Business Information Systems, Third Canadian Edition is written for both the IT and non-IT major. It is written in a friendly, accessible style that will draw students in and engage them with the content. Expanded coverage of highly technical concepts is included in the Technology Core box found in each chapter as well as the Tech Guides.
